

Karan Malhotra

Python Developer | Backend & Automation

karan.malhotra@example.com | +91 98765 11223 | Pune, India | [github.com/karan-malhotra-dev](#) | [linkedin.com/in/karan-malhotra-dev](#)

SUMMARY

Entry-level Python Developer with 1+ year of experience building backend features, REST APIs and automation scripts through an internship and academic projects. Strong foundation in Python, object-oriented programming, data structures and SQL. Comfortable with Flask, Django and FastAPI, Git-based workflows, debugging and writing clean, readable, well-documented code. Quick learner with good communication and problem-solving skills, experienced in collaborating with remote teams.

SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, Django, FastAPI, Pandas, Requests

Databases: MySQL, PostgreSQL, SQLite

Concepts: OOP, Data Structures, REST API, JSON, HTTP, Debugging, Unit Testing, Automation

Tools: Git, GitHub, VS Code, Postman

Soft Skills: Communication, Problem Solving, Documentation, Remote Collaboration

EXPERIENCE

Python Developer Intern, TechNova Solutions

Jul 2025 – Present

Remote

- Developed and maintained Python application features and REST API endpoints using Flask and FastAPI.
- Wrote SQL queries to store, retrieve and process application data in MySQL and PostgreSQL databases.
- Built automation scripts with Python and Pandas that reduced manual report preparation time by 40%.
- Debugged and fixed application issues, wrote unit tests, and reviewed code to improve readability.
- Used Git and GitHub for version control, feature branches and pull requests; prepared technical documentation.

PROJECTS

Student Management REST API

Python, FastAPI, PostgreSQL

- Designed a REST API with JWT login and CRUD operations; applied OOP principles for modular, reusable code.
- Returned JSON responses, handled HTTP errors and documented endpoints; tested APIs with Postman.

Expense Tracker Web App

Python, Django, MySQL, JavaScript

- Built a full web application with user accounts, expense categories and monthly charts.
- Created a responsive front end with HTML, CSS and JavaScript connected to Django views and a MySQL database.

CSV Data Automation Tool

Python, Pandas, Requests

- Automated file-based data cleaning and merging for large CSV files, and fetched data from public APIs with Requests.
- Used data structures such as dictionaries, sets and queues to process records efficiently.

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Savitribai Phule Pune University | CGPA: 8.4 / 10

CERTIFICATIONS

- Python for Everybody (online course)
- SQL for Data Analysis (online course)
- Git & GitHub Essentials (online course)
